PARTICIPANTS

AI generated summaries 🧠 are a premium feature. We'll share them with you for a few retros so you can see what they're like.

🧠 Meeting Summary

Improvements needed in communication between business and tech teams, more clarity on decisions made. Multiple teams within the team causing lack of alignment. Prioritization issues, incomplete tasks, and lack of estimation affecting progress. Need for better communication, clear explanations, and visibility on migration plan.

Topics

Communication

🧠 Topic Summary

Improve team communication to avoid misinterpretations and frustrations.

 Discussion Summary

Multiple teams within the team can sometimes lead to a lack of alignment in the same direction. There is a need for clearer communication and understanding between the business and technical sides to ensure progress in the right direction.

Faire équipe

Mad

J'ai parfois l'impression qu'on arrive pas à bien communiquer, ça peut créer des interprétations ou des frustrations

Sad

Outils

 Topic Summary

Discussion on managing common tools like Gitbook, Google Drive, and Airtable, including reflection on their use and the backlog tool. Note: Airtable is not well-liked.

 5

gestion des outils communs : gitbook, google drive, airtable

Mad

Réflexion à avoir sur les outils

Sad

Airtable c'est naze !

Mad

outil backlog

Sad

Outils / Backlog

Sad

Ops

 Topic Summary

They discussed the lack of governance and the need to address it, as well as the untouched infrastructure.

 4

[See 2 Comments](#)

Infrastructure pas encore attaquer

Mad

Gouvernance stats / DATA

Sad

Pas de gouvernance, il va être temps de s'y mettre

Mad

Priorisations

 Topic Summary

They feel overwhelmed by constant feature requests but also acknowledge the need to progress with migration. The team struggles to keep up with a growing list of tasks related to migration, support, evolution,

and operations.

 Discussion Summary

Struggling with prioritization and sprint planning, they have been taking tickets from previous sprints and adding new ones without completing them. There is a need for improvement in defining sprints and including business design in them, as well as properly estimating and addressing non-coding technical tasks.

 3

[See 3 Comments](#)

J'ai l'impression de sans arrêt dire non aux "évolutions" / freiner les demandes d'évolution sur les features. Mais en même temps on a besoin d'avancer dans la migration

Mad

Les sujets d'accumulent (migration + support + évolution + ops) et on a du mal à dépiler

Sad

Sprint planning Plannif

 3

[See 1 Comment](#)

Sprint planning trop fouilli (difficile d'organiser un sprint, parfois ya de la conception métier pendant la plannif, ...)

Sad

Environnements De

 Topic Summary

Increase testing on staging, set up pre-prod environment for testing, address attack on staging.

 3

No Comments

attaque sur staging

Mad

plus de tests sur staging

Sad

Les environnements

Sad

Environnement pré-prod pour tester

Sad

Conception fonctionnalités

 Topic Summary

They discussed meeting the business needs and focusing on quick wins rather than long-term solutions. They

also noted a lack of clear explanations for why certain approaches are not preferred.

3

No Comments

Prise en compte besoins métiers

Sad

Manque encore parfois d'explications claires sur pourquoi telle voie n'est pas privilégiée (cf GF) ou pour estimation

Sad

On etudie des fonctionnalites sparadrap au lieu de s'attaquer a la source du probleme (quickwin vs solution long terme)

Sad

Charge Mep

2

No Comments

La charge mentale de la MEP raccordement, franchement je veux plus faire des trucs comme ça, trop critique 🙄

Mad

Produit Vision

Ouverture du canal dev,
présentation plan migration
= plus de communication
entre métier et technique

Glad

Dx Productivité Dev

🧑🏻‍💻 Topic Summary

Productivity is being hampered by low quality DX. They are currently working on completing the build for testing.

👍 1

No Comments

DX : build complet pour les
tests, en cours de dev

Mad

La DX n'est pas au niveau,
ça réduit clairement la
productivité
